EXPERIENCE

Product Designer

Feb '23 - Present

Cisco

Plano, TX (Remote)

Designed enterprise experiences for Cisco's IT Design team focused on employee support, access management, and security workflows. Led and contributed to large-scale UX initiatives that improved usability, streamlined internal operations, and modernized support experiences through AI-powered and self-service solutions. Collaborated cross-functionally with product managers, engineers, researchers, content designers, and executive stakeholders to deliver scalable web platform experiences.

- Designed end-to-end user experiences for enterprise platforms including HelpZone, MyID Groups, and OneAccess, supporting thousands of internal users across Cisco
- Created wireframes, user flows, high-fidelity mockups, prototypes, and design specifications to communicate concepts and align cross-functional teams
- Led UX strategy and interaction design efforts for AI-powered support experiences, unified chat workflows, approval systems, and access management tools
- Conducted stakeholder workshops, discovery sessions, heuristic evaluations, and usability discussions to identify pain points and define scalable solutions
- Partnered with engineering and design system teams to ensure consistency, accessibility, and alignment with enterprise UX standards across products
- Contributed to design operations and cross-team collaboration through documentation, design critiques, metrics storytelling, and AI-assisted design workflows

UX/UI Design Mentor

Apr '22 - Jul '25

Springboard

Plano, TX (Remote)

Mentored 10+ aspiring product designers for a 40-week UX/UI design course, topics consisting of design thinking, UX and UI research, wireframes and prototypes, job search and interview tactics.

- Mentored and coached new designers through weekly individual mentorship sessions
- Provided career guidance, portfolio feedback, and project critiques to support student growth and job readiness

UX/UI Designer

Oct '21 - Feb '23

J.P. Morgan Chase

Plano, TX

Worked for JPMorgan Chase on the Home Lending team. Built an internal application that will improve and revolutionize the workflow for the company's home lending advisors. Built an in-house mortgage application flow to help simplify home buying and give customers a more personalized digital experience. Collaborated with business and development teams to envision solutions and bring them to life. Participated in research and discovery sessions with users, product owners, architects and other stakeholders to achieve a shared understanding of the requirements and solutions.

- Composed wireframes, mockups and interactive prototypes to communicate design concepts and detailed designs to users, business and technology teams
- Defined UX strategies to improve customer experiences, increase productivity, reduce task completion time and lessen user confusion
- Ensured that applications adhere to UX and architecture standards, risk management and security guidelines and ADA Accessibility standards

UX/UI Designer

Jan '21 - Oct '21

OxeFit

Plano, TX

Conducted all aspects of the design process, including leading discovery, crafting mockups, and creating interactive prototypes to solve and communicate innovative design solutions. Designed products across mobile, web, and GUI devices that targeted specific customer values as well as business goals for professional athletes and rehab centers. Collaborated with product managers, development teams, and executive stakeholders to deliver creative solutions.

- Created an extensive and orderly design system of components, symbols, styles, and guidelines based on the knowledge of UX best practices, visual design principles, and user needs
- Provided creative direction and conducted design reviews to ensure that the overall vision for the products were achieved, and the system was being used properly

ADDITIONAL DESIGN EXPERIENCE

Assistant Designer Jan '19 - Jan '20	JCPenney New York, NY
Worked on the Liz Claiborne team. Oversaw and exhibited a diverse range of design abilities in multiple categories including women's knit and woven. Engaged in all aspects of design process from development through production, approving samples and changing sketches as needed.	
· Created cohesive concept boards, sketched and designed new ideas, and created technical packages for each collection with brand aesthetic and vision · Managed fabric development; sourcing textiles and trims, and ordering fabrics and trims	
Freelance Designer Sep '17 - Jan '20	Banana Republic New York, NY
Worked on the Banana Republic Factory (BRFS) team. Assisted in a diverse range of categories including women's C&S, sweaters, and woven.	
· Researched current market trends and concepts that supported the brand identity · Assisted team with sketches, tech packs and product line sheets · Maintained and organized the PLM system, CADs, BOMs, constructions, and specs	
Design Intern 2018 - 2019	Shinsung J&T New York, NY
Created design assets, prints, and prototypes while collaborating with fashion brands and overseas factories to support product development and production workflows.	
Design Intern 2017	Marc Jacobs New York, NY
Supported the accessories design team through prototype creation, technical flats, archive management, and trend research for seasonal collections.	
Design Intern 2017	Vonbern Bern, Switzerland
Contributed to the S/S 2017 collection by creating technical flats and assisting with sample-making, pattern development, and production preparation.	
Production/Fashion Designer 2015 - 2016	Code22 Norcross, GA
Managed seasonal collection development including sketching, tech packs, production coordination, branding, packaging, and photoshoot direction.	
Assistant Sign Designer 2015	Vicky Sign Suwanee, GA
Designed signage concepts and CAD-based prototypes while consulting clients on visual branding, aesthetics, and functionality.
